Security Awareness	Secure WordPress Practices, Backups, Plugin/Theme Updates, Cloudflare Security, Form Security, XSS/CSRF/SQL Injection Awareness

WORK EXPERIENCE

Website Developer | GOOP Digital | Geelong, Australia | Apr 2025 - Apr 2026

- Developed and delivered custom WordPress websites using GOOP's proprietary theme, converting Figma designs into responsive, performance-focused builds for business clients.
- Built 20+ WordPress websites and supported a managed portfolio of 500+ websites through maintenance, updates, production troubleshooting and performance support.
- Created custom plugins and workflow automation tools to support bulk updates across large website portfolios, reducing repetitive manual work and improving delivery efficiency.
- Used PHP, HTML, CSS, JavaScript and WordPress best practices to build maintainable website features, client-manageable sections and reliable frontend components.
- Managed GitHub-based version control and deployments, improving collaboration, safer releases and visibility across active development work.
- Administered Cloudflare DNS, caching and security configurations, and maintained sites across WP-Manage, WHM/cPanel and WP Engine environments.
- Integrated payment gateways, third-party tools and APIs within WordPress and WooCommerce to support secure transactions and improved website functionality.
- Troubleshooting frontend, backend, hosting, DNS, plugin and performance issues, explaining fixes clearly to internal teams and client-facing stakeholders.
- Built high-converting Mailchimp email templates and supported digital marketing requirements across website and campaign delivery.

Web Developer | WebOracle | Melbourne, Australia | Nov 2022 - Mar 2025

- Built and maintained responsive WordPress, WooCommerce and Shopify websites, translating design briefs into reliable, production-ready digital experiences.
- Converted Figma and Adobe XD designs into mobile-first web pages using HTML, CSS, JavaScript and PHP across browsers and devices.
- Developed and configured WordPress features including custom layouts, forms, WooCommerce functionality, SEO elements and client-editable content sections.
- Improved website performance through caching, image optimisation, code cleanup, plugin review and Core Web Vitals-focused fixes.
- Resolved plugin conflicts, broken layouts, hosting errors, DNS problems, email delivery faults and post-migration defects.
- Managed hosting, cPanel, WP Engine, Cloudflare DNS, domain setup, website migrations and staging-to-live deployments for client websites.
- Worked directly with clients and internal stakeholders to clarify requirements, explain technical issues in plain language and deliver practical solutions.
- Supported SEO outcomes by implementing metadata, redirects, technical SEO fixes, indexation checks, Google Search Console setup and analytics tracking.

Web Developer Intern | WebOracle | Melbourne, Australia | Mar 2022 - Oct 2022

- Assisted with website builds, CMS updates and frontend enhancements across WordPress, Joomla and Squarespace projects.
- Implemented content updates, layout changes and SEO improvements while learning production workflows and client delivery standards.
- Supported troubleshooting and QA across responsive layouts, browser compatibility, forms and content management tasks.

Web Developer Intern | Battlerz | Melbourne, Australia | Jun 2021 - Oct 2021

- Designed, updated and maintained WordPress websites, improving page structure, content presentation and usability.

SELECTED PROJECTS

Custom WordPress, WooCommerce and Multi-Site Support: Delivered responsive business websites and eCommerce stores with product management, enquiry forms, payment flows, third-party integrations and SEO-ready page structures.

Large Portfolio Maintenance: Supported updates, troubleshooting, migrations, DNS changes, backups, Cloudflare caching/security and post-launch quality checks across managed website environments.

Performance, Migration and Technical SEO Support: Improved reliability and search visibility by managing redirects, Google Search Console verification, caching, Core Web Vitals checks and staging-to-live release tasks.

Frontend and CMS Delivery: Built structured CMS sections, listing-style layouts, lead capture forms and mobile-friendly user journeys for business, real estate and content-driven websites.

EDUCATION

Bachelor of Information Technology and Systems - Web and Software Development | Victorian Institute of Technology, Australia | 2022

Professional Year Program in Information Technology | Performance Education / Australian Computer Society, Australia | 2023

Diploma in Computer Engineering | R.C.T.I Ahmedabad, India | 2019

ADDITIONAL EXPERIENCE

- Comfortable working from scoped briefs, prioritising tickets and delivering independently without heavy supervision.
- Experience communicating with clients, marketers, offshore partners and non-technical stakeholders on website issues and delivery requirements.
- Actively strengthening modern frontend and full stack skills including React, API-driven websites, Git-based delivery and AI-assisted development.
